

# CSS Margin Properties

- The CSS margin properties are used to create space around elements, outside of any defined borders.

- This property can have from one to four values.

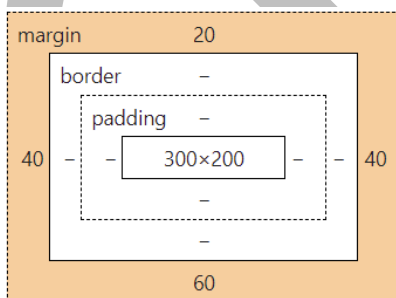

- **If the margin property has four values:**

- **margin** :20px 40px 60px 80px;

- top margin is 20px
- right margin is 40px
- bottom margin is 60px
- left margin is 80px

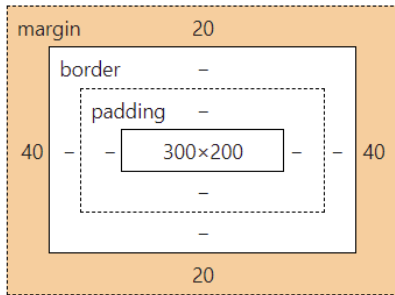

- **If the margin property has three values:**

- **margin** :20px 40px 60px;

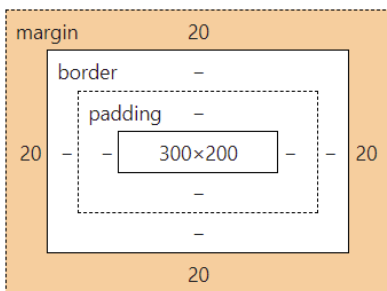

- top margin is 20px
- right and left margin are 40px
- bottom margin is 60px

- If the margin property has two values:

- **margin** :20px 40px;
  - top and bottom margin are 20px
  - right and left margin are 40px

- If the margin property has one value:

- **margin** :20px;
  - all four margin are 20px

- **margin-top**: 10px;
- **margin-bottom**: 10px;
- **margin-left**: 10px;
- **margin-right**: 10px;

- **Note**: Negative values are allowed.

- Syntax:

`margin: length | auto;`

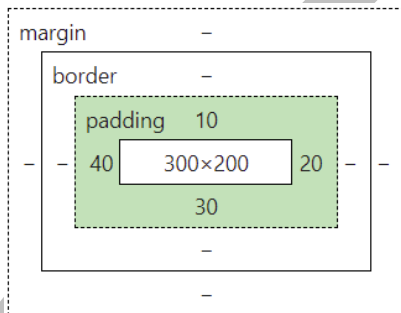

- **length** - specifies a padding in px, pt, cm, etc.
- **%** - specifies a padding in % of the width of the containing element.
- **Auto** - The browser calculates a margin

## CSS Padding Properties

- An element's padding is the space between its content and its border.
- This property can have from one to four values.

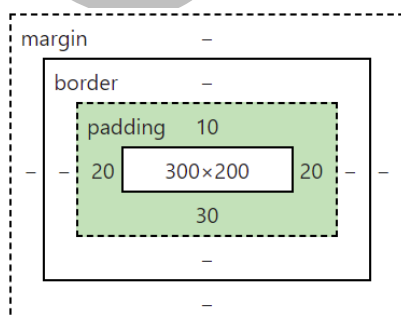

Lorem ipsum, dolor sit amet consectetur adipisicing elit. Quisquam nemo molestiae assumenda velit voluptatibus cupiditate debitis repellendus saepe laudantium quos quam, eligendi nam, suscipit quidem nesciunt porro tempora. Quis, quos. Lorem ipsum dolor sit amet consectetur adipisicing

- If the padding property has four values:

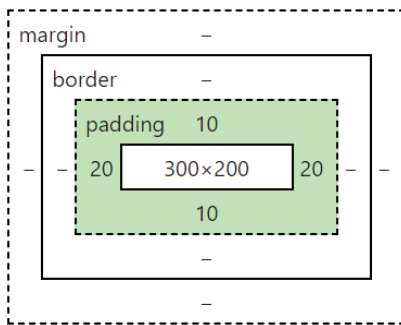

- **padding:**10px 20px 30px 40px;
  - top padding is 10px
  - right padding is 20px
  - bottom padding is 30px
  - left padding is 40px

- If the padding property has three values:

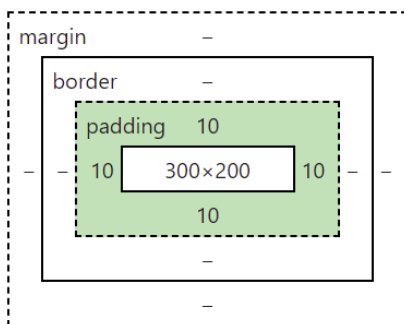

- **padding:**10px 20px 30px;
  - top padding is 10px
  - right and left padding are 20px
  - bottom padding is 30px

- If the padding property has two values:

- **padding:10px 20px;**
  - top and bottom padding are 10px
  - right and left padding are 20px

- If the padding property has one value:

- **padding:10px;**
  - all four paddings are 10px

- **padding-top:** 10px;
- **padding-bottom:** 10px;
- **padding-left:** 10px;
- **padding-right:** 10px;

- **Note:** Negative values are not allowed.

- **Syntax:**

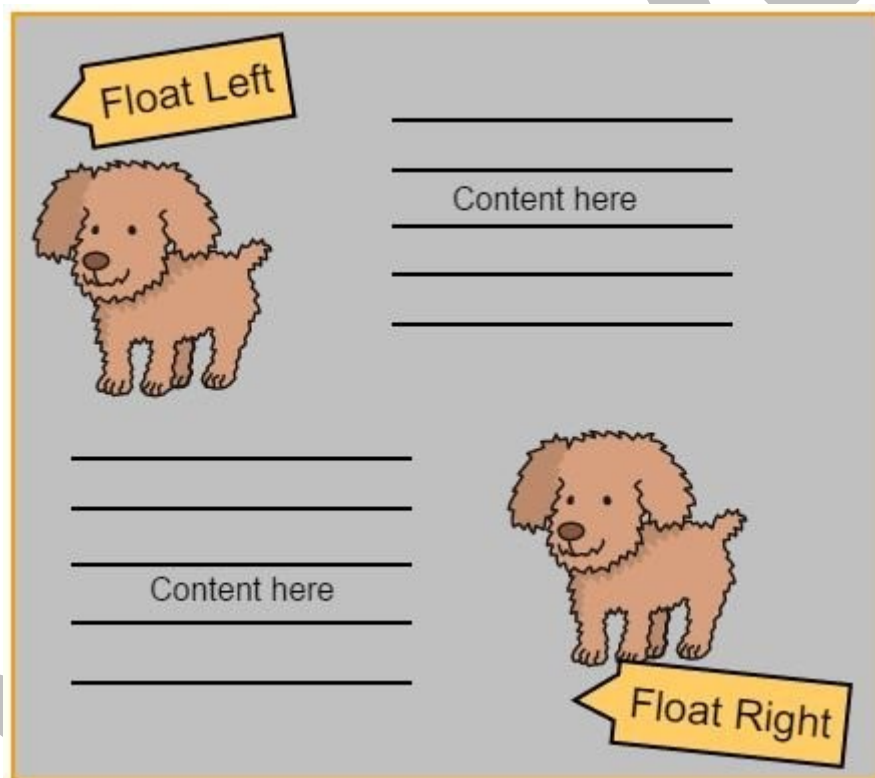

**padding:** length;

- **length** - specifies a padding in px, pt, cm, etc.
- **%** - specifies a padding in % of the width of the containing element.

## CSS Float Properties

- The **float** property specifies whether an element should float to the left, right, or not at all.
- Syntax:

**float** : none | left | right ;

## CSS calc() Function

- The **calc()** function performs a calculation to be used as the property value.
- **Syntax:**

*calc(expression)*

| Value      | Description                                                                                                             |
|------------|-------------------------------------------------------------------------------------------------------------------------|
| expression | Required. A mathematical expression. The result will be used as the value. The following operators can be used: + - * / |
